DID YOU KNOW 4,000,000 TONS OF TOP SOIL ARE WASHED AND BLOWN AWAY YEARLY?

Why Not Put a Stop to the Droughts?

PLANT FOREST TREE SEEDLINGS FOR REFORESTATION

The Egyptians transported trees 1500 miles over 4,000 years ago. Babylonians and Greeks were also great tree planters.

Our rain-making trees are practically gone, and instead of business men taking an interest in work that will save this country, as they did in England and Europe in the 15th century, they wait for something to turn up, as they still do in treeless Asia and Northern Africa.

With 4,000,000 tons of our top soil washed or blown away yearly, 50,000,000 acres has produced its last food, over a million on farms must be supported or moved where they can make a living, and half of the world starving, still college graduates, who know ancient history say: "Teaching children to plant trees for lumber and saving land still producing grain is a kindergarten proposition."
